

NATIONAL POPULAR VOTE GIVES ELECTION DENIERS THE POWER TO STEAL MAINE'S ELECTORAL VOTES!

THE FACTS

- National Popular Vote would require Maine's Secretary of State to accept vote totals produced by every other state – **EVEN IF MANIPULATED!**
- At least **FIVE STATES** – Alabama, Indiana, Missouri, West Virginia, and Wyoming – have Secretaries of State that refuse to acknowledge Biden's victory in 2020!
- Any one of these **ELECTION DENIERS** might manipulate vote totals reported and used to determine the winner with National Popular Vote.
 - Example: an Alabama Secretary of State could report vote totals as if every voter cast nine votes—one for each presidential elector—adding millions to the Republican candidate's margin!
 - Example: a Missouri Secretary of State could reject the vote count from St. Louis and then report incomplete totals, leaving out hundreds of thousands of votes from an overwhelmingly-Democratic area!
- **ELECTION DENIER** Secretaries of State could suppress Democratic votes and National Popular Vote says compact states would be forced to go along!
- It would be difficult—perhaps impossible—to sue an **ELECTION DENIER** Secretary of State due to Supreme Court precedent, which means National Popular Vote states would have to use **MANIPULATED VOTE TOTALS** to determine the winning candidate!
